DOLVET[®] Saccharomyces Plus

BREWER'S YEAST PLUS BETA-GLUCAN AND MOS

Properties

Dolvet Saccharomyces Plus is a natural formula containing dry *Saccharomyces cerevisiae* brewer's yeast enriched with natural prebiotics: mannan-oligosaccharides, beta-glucans, which strengthen the body's immune system. Brewer's yeast contain B vitamins, mineral compounds and protein of valuable amino acid composition. They regulate digestive processes, improve the condition of skin and coat. The formula is a natural, valuable addition to food.

Packaging

300 g

Composition

dry brewer's yeast,
mannan-oligosaccharides,
beta-glucans

Instructions for use

cats and small dogs - 0,5 measure / day
medium-sized dogs - 1 measure / day
large dogs - 1,5 measure / day
1 measure = 2,5 g

DOLVET® Calcium

RED ALGAE AND OYSTER SHELLS

Properties

Dolviet Calcium a natural source of calcium from red algae *Phymatolithon calcareum* (Lithothamnium calcareum) and oyster shells. Calcium influences the proper development of the skeleton and dentition, especially in growing animals. It is essential for proper development. Red algae also provide a natural form of other precious minerals which support the condition of bones, muscles and heart. The formula is an excellent source of highly absorbable calcium and covers the demand for calcium in BARF diet.

Packaging

500 g

Composition

70% red algae,
30% calcium carbonate
from oyster shells

Instructions for use

1 measure (5 g) for 10 kg
body weight / day

TYPE II COLLAGEN, MSM AND WILD ROSE

Properties

Dolvét Flex enriches diet with valuable natural ingredients. The formula contains type II collagen - the most important protein component of joint cartilage. It determines the strength and resistance of the cartilage. MSM is an organic sulfur compound necessary for the reconstruction of joints. It speeds up the processes of regeneration of muscle tissue, connective tissue and cartilage. Wild rose is a natural source of vitamin C, which participates in the synthesis of collagen. Recommended for young dogs during intensive growth, as well as for animals with joint disorders.

Packaging

100 g

Composition

hydrolyzed type II collagen,
MSM, wild rose extract

Instructions for use

cats and small dogs - 1-2 measures / day
medium-sized dogs 2-3 measures / day
large dogs - 3-4 measures / day
1 measure = 0,6 g

DOLVET® Spirulina

SPIRULINA

Properties

The formula contains spirulina rich in high quality protein (over 60%), as well as vitamins, minerals and other nutrients that strengthen the immune system, improve the functioning of the digestive tract, help in detoxification, reduce the growth of cancer cells, reduce the incidence of allergies, and have a beneficial effect on the coat and skin. The formula is completed with dry brewer's yeast which improves its taste. Regular use of **Dolvét Spirulina** strengthens and stimulates the body, and gives vital power.

Packaging

150 g

Composition

97% Spirulina, 3% dry brewer's yeast

Instructions for use

cats and small dogs – 1-2 measures / day
medium-sized dogs – 3-4 measures / day
large dogs – 4-6 measures / day
1 measure = 0,5 g

DOLVET[®] Kelp

BROWN SEA ALGAE

Properties

Dolvet Kelp contains brown sea algae - *Ascophyllum Nodosum* (Norwegian kelp) rich in vitamins, amino acids and minerals as well as essential unsaturated fatty acids. Brown algae are one of the best natural sources of iodine for the body. Due to the rich composition of algae, their use in animal nutrition has a beneficial effect on given systems: digestive, skeletal, circulatory, urinary, as well as on skin and coat. It helps to maintain oral hygiene in dogs and cats. The formula is completed with brewer's yeast, which improves its taste. Dolvet Kelp is a natural, valuable supplement to your pet's food.

Packaging

250 g

Composition

97% *Ascophyllum Nodosum* sea algae,
3% dry brewer's yeast

Instructions for use

cats and small dogs - 0,5 measure / day
medium-sized dogs - 1 measure / day
large dogs - 1,5 - 2 measures / day
1 measure = 3 g

DOLVET[®] Protein

HEMOGLOBIN, BLOOD PLASMA

Properties

Dried blood plasma is an excellent source of highly absorbable animal protein, distinguished by a high content of essential amino acids. The spray-dried blood plasma contains valuable immunoglobulins and supports animals' immune system.

Hemoglobin has also a high content of digestible protein and a source of iron. The formula is an excellent natural supplement to the BARF diet.

Packaging

200 g

Composition

hemoglobin, blood plasma

Instructions for use

1 measure (2,5 g) for 20 kg body weight daily or

1 measure (2,5 g) for 200 g of meat

DOLVET® Parasit

STOP TO PARASITES

Properties

Dolvet Parasit contains natural plant extracts: pumpkin seed, thyme, fennel and absinthe, as well as diatoms which support eliminating parasites from the digestive system. The components of the formula help to remove parasites from the intestine, without damaging the mucous membrane of the digestive tract.

Packaging

70 g

Composition

products of plant processing: pumpkin seed extract, thyme extract, fennel extract, absinthe extract; diatomaceous earth

Instructions for use

1 measure (0,6 g) for 5 kg body weight daily. Administer for 7 consecutive days. After this period, one should take a 10 days break, and repeat the administration if necessary.
