**formulas
for horses**

ALFIS

We are a Polish company, founded by veterinarians, developing a comprehensive range of formulas for companion animals. We have been present on the market for many years, offering top quality products, developed in cooperation with specialists in animal nutrition, veterinarians and technologists.

Animals' health and well-being are our priority

The products we offer are manufactured from scratch in our company located in the centre of Poland. Raw materials, which undergo detailed verification in our laboratory, are sourced from renowned suppliers. For the production of our formulas we use safe ingredients with effectiveness confirmed by scientific research, which guarantees their maximum absorption.

Our production and distribution processes are improving systematically. We pay particular attention to the needs and signals from our customers, treating them as one of the policy elements that help us to develop, improve and modernise the company and its products.

In this catalogue, you will find a wide range of formulas that pet owners around the world associate with addressing the nutritional and health problems faced by horse breeders and keepers.

Horsemilk

COMPLETE MILK REPLACER FOR FOALS

- Proper foal growth and development
- Complete coverage of the young organism's needs
- Good health
- Appropriate levels of protein and essential amino acids
- Highly digestible fat
- Essential vitamins and minerals

Indications

- Complete replacement of mother's milk in case of agalactia, rejection of the foal or death of the mare
- Complementary feeding in case of mare insufficient milk secretion

How to apply

In case of complete replacement of the mare's milk:

Foal's age	Number of servings per day	Amount of formula per 1 serving	
		Water (litres)	Horsemilk (g)
0-2 days	24	0.2-0.25	40-50
3-4 days	15-18	0.3-0.4	60-80
5-7 days	10-15	0.5-0.7	100-140
2 weeks	10-12	0.8-1.2	160-240
3 weeks	8-10	1.3-1.5	260-300
4 weeks	6-8	1.6-2.0	320-400
2 months	6	2.1-2.5	420-500
3 months	4	4	800
4 months	3	4.5	900
5 months	2	3	500

These recommendations apply to a complete replacement of the mother's milk. The amounts can be modified according to the health condition, individual features and foal's needs. Horsemilk should be dissolved in water at a temperature of 42-45°C. Feeding temperature: 38-42°C. During the first week, the water used to prepare the solution should be boiled and cooled.

If the formula shall only be a supplement to mother's milk, one should apply 100-150 g of Horsemilk dissolved in one litre of water 3-4 times a day in a dose adapted to foal's needs.

Packaging

20 kg, 10 kg, 5 kg

Composition per 1 kg

Crude protein	22.5 %
Crude fats	13.5 %
Crude ash	0.2 %
Crude fibre	7 %
Vitamin A	50 000 IU
Vitamin D ₃	8 000 IU
Vitamin E	88 mg
Vitamin B ₁	10 mg
Vitamin B ₂	15 mg
Vitamin B ₆	4 mg
Vitamin B ₁₂	160 µg
Niacin	40 mg
Pantothenic acid	20 mg
Iron	130 mg
Iodine	1 mg
Copper	11 mg
Manganese	60 mg
Zinc	50 mg
Selenium	0.3 mg

DL-Methionine + Cystine	6 g

Homogenized oil and whey concentrate, whey powder, coconut oil, soybean oil, soy protein concentrate

Composition per 1 kg

Beta-1,3/1,6-glucan	15 000 mg
Beta carotene	100 mg
Vitamin A	3 000 000 IU
Vitamin D ₃	200 000 IU
Vitamin E	40 000 mg
Vitamin K	800 mg
Vitamin B ₁	1 200 mg
Vitamin B ₂	1 600 mg
Vitamin B ₆	1 000 mg
Vitamin B ₁₂	10 000 µg
Vitamin C	20 000 mg
Biotin	80 000 µg
Niacin	3 000 mg
Pantothenic acid	2 000 mg
Folic acid	1 000 mg
Choline chloride	20 000 mg
Iron	15 000 mg
Iodine	69 mg
Copper	2 000 mg
Manganese	9 500 mg
Zinc	12 000 mg
Selenium	36 mg
Calcium	100 mg
Magnesium	80 g
Phosphorus	46 g
Sodium	15 g

Dicalcium phosphate, calcium-magnesium carbonate, brewer's yeast, magnesium oxide, sodium chloride, mannan-oligosaccharides (MOS)

Horsemix® Colt

VITAMINS, MINERALS, BETA GLUCANS
FOR FOALS AND YOUNG HORSES

- Proper development of foals and young horses
- Strengthening of general shape
- Improvement of vital processes
- Harmonious development of the musculoskeletal system
- Beneficial effects on coat and hooves
- Support for the body during weaning
- Vitamins and minerals with high bioavailability
- Natural immune factors – Beta-1,3/1,6-glucan, mannan-oligosaccharides (MOS) – proper functioning of the immune system

How to apply

Under 5 months old: 1 measure (5 g) / day

From 5 to 9 months old: 2 measures (10 g) / day

Over 9 months old: 3 measures (15 g) / day

Packaging

500 g

2 kg

Horsemix[®] Mare

VITAMINS, MINERALS, AMINO ACIDS
FOR BREEDING MARES

- Support for the mare's organism in the preparation for heat and reproduction
- Correct course and symptoms of heat
- Successful foaling
- Proper foetus development
- Increased milk yield
- High immunity
- Complete supplementation of mineral-vitamin-acid deficiencies in mares and foetus
- High level of vital nutrients for proper reproductive function
β-carotene, vitamins A, D₃, E, selenium and zinc

How to apply

Powder

4 measures (20 g) / mare / day

6-8 measures (30-40 g) / mare / day - if the formula is the only additive to a dose composed of hay and oats and the mare has no access to pasture

Tablets

12 tablets / mare / day

Packaging

500 g

2 kg

170 tablets

Composition per 1 kg

Beta carotene	9 000 mg
Vitamin A	5 400 000 IU
Vitamin D ₃	540 000 IU
Vitamin E	70 000 mg
Vitamin K	1 500 mg
Folic acid	2 000 mg
Niacin	10 000 mg
Pantothenic acid	4 800 mg
Iron	21 000 mg
Copper	2 500 mg
Manganese	15 000 mg
Zinc	12 000 mg
Iodine	161.4 mg
Selenium	117 mg
L-Lysine	86 g
DL-Methionine + Cystine	60 g
Threonine	3 g
Tryptophan	0.8 g
Valine	3.5 g
Calcium	80 g
Phosphorus	40 g
Sodium	8 g
Sulfur	30 g

Dicalcium phosphate, brewer's yeast, calcium carbonate

Composition per 1 kg

Beta carotene	2 000 mg
Vitamin A	5 760 000 IU
Vitamin D ₃	576 000 IU
Vitamin E	100 000 mg
Vitamin C	141 500 mg
Iron	24 000 mg
Manganese	15 000 mg
Copper	2 400 mg
Zinc	15 000 mg
Iodine	184.4 mg
Selenium	134 mg
L-Lysine	170 g
DL-Methionine + Cystine	120 g
Calcium	15 g
Phosphorus	6 g
Sodium	8 g
Sulfur	43 g
Magnesium	40 g

Magnesium oxide, calcium and magnesium carbonate, dicalcium phosphate, brewer's yeast

Horsemix[®] Stallion

VITAMINS, MINERALS, AMINO ACIDS
FOR BREEDING STALLIONS
AND SPORT HORSES

- Coverage of mineral and vitamin requirements for stallions and sport horse
- Increasing performance
- Achieving and maintaining performance horses in optimum shape
- Support preparation for reproduction
- Proper testicle functioning
- High semen quality
- High mating efficiency
- Proper bone mineralisation, good limbs condition

How to apply

Powder

4 measures (20 g) / horse / day

4-6 measures (20-30 g) / horse / day – if the stallion is simultaneously used in sport and breeding

6-8 measures (30-40 g) / horse / day – if the formula is the only additive to a dose composed of hay and oats

Tablets

12 tablets/ horse / day

Packaging

500 g

2 kg

170 tablets

Horsemix® Biotin

SUPPORTS REGENERATION OF HOOVES AND SKIN

- Supporting correct formation of the hoof cup structure
- Proper growth of resilient, hard, and elastic hoof horn
- Hoof resistance to mechanical influences and trauma
- Healthy, well-hydrated, elastic skin
- Improved, shiny coat
- Biotin, amino acids, zinc, sulphur and B vitamins with high bioavailability
- Diatomite – source of highly-absorbable silicon – building block of hoof horn and hair
- Wild rosehip, nettle, omega -3 and -6 acids – support of hoof and skin regeneration

When to apply

- Support in case of problems with the maintenance of healthy hooves and skin
- Brittle, cracking, weak, slow-growing hooves
- Support in cases of laminitis or the risk of laminitis
- Dry skin
- Dull coat
- Support in skin allergies

How to apply

Young horses under 3 years – 1 measure / day

Adult horses – 2-3 measures / day

Packaging

1 800 g

600 g

Composition per 1 kg

Biotin	5 700 000 µg
Zinc	37 000 mg
L-Methionine	332 000 mg
Copper	2 500 mg
Selenium	45 mg
Vitamin A	1 500 000 IU
Vitamin C	10 000 mg
Vitamin E	5 000 mg
Vitamin B ₆	800 mg
Sulphur	72 g
Silicon	35 g

Essential fatty acids (EFAs), galactolipids, polyphenols

Brewer's yeast, linseed flour, nettle extract (Urtica dioica), rosehip extract (Rosa Canina), diatomaceous earth (diatomite)

Composition per 1 tablet

Biotin	9 000 µg
Zinc	59.2 mg
L-Methionine	532 mg
Copper	4.7 mg
Selenium	90 µg
Vitamin A	2 400 IU
Vitamin C	30 mg
Vitamin E	15 mg
Vitamin B ₆	1.6 mg

Essential fatty acids (EFAs), sulphur, polyphenols
Brewer's yeast, nettle extract (*Urtica dioica*),
marine brown algae (*Ascophyllum nodosum*),
dicalcium phosphate

Horsemix[®] Biotin

SUPPORTS REGENERATION OF HOOVES AND SKIN

Formula in tablet form

- Supporting the correct formation of the hoof cup structure
- Proper growth of resilient, hard, and elastic hoof horn
- Hoof resistance to mechanical influences and trauma
- Healthy, well-hydrated, elastic skin
- Improved, shiny coat
- Biotin, amino acids, zinc, sulphur and B vitamins with high bioavailability
- Essential fatty acids
- Brown algae, nettle – support hoof regeneration, improve skin and coat condition

When to apply

- Support in case of problems with the maintenance of healthy hooves and skin
- Brittle, cracking, weak, slow-growing hooves
- Support in cases of laminitis or the risk of laminitis
- Dry skin
- Dull coat
- Support in skin allergies

How to apply

Young horses under 3 years – 2 tablets / day
Adult horses – 3-5 tablets / day

Packaging

150 tablets

Horsemix® ArthroFos

PROPER JOINT FUNCTIONING

- Glucosamine and chondroitin – proper joint nutrition
- Hyaluronic acid – basic component of synovial fluid – increasing the penetration of nutrients into tissues
- Hydroxychloride-derived micronutrients – support of cartilage regeneration
- Silicon – formation of collagen fibres in connective tissue
- Antioxidant complex – increasing the body's protection against free radicals
- Vitamin D₃ - stabilises the development of the skeletal system
- Vitamin C – collagen synthesis – main component of joint cartilage
- MSM – joint reconstruction
- Boswellic acids, curcumin, nettle extract – proper joint mobility

When to apply

- Correct development of the musculoskeletal system in foals, weanlings, young horses
- Protection of joints in horses exposed to heavy loads (sport horses, working horses, pregnant mares)
- Support for degenerative changes in the locomotor system
- Support for osteoarthritis and joint inflammation
- Protection of stressed joints in overweight horses
- Recovery after injuries and orthopaedic surgery

How to apply

Foals – 0.5 measure (10 g) / day

Adult horses – 1-1.5 measure (20-30 g) / day

Packaging

1 500 g

500 g

Composition per 1 kg

Glucosamine	135 000 mg
Chondroitin sulphate	97 500 mg
MSM (methylsulfonylmethane)	100 000 mg
Hyaluronic acid	5 400 mg
Vitamin D ₃	100 000 IU
Vitamin C	80 000 mg
Vitamin E	12 000 mg
Copper	2 500 mg
Manganese	15 000 mg
Zinc	12 000 mg
Selenium	45 mg
Silicon	120 g
Sulphur	34 g
Calcium	15 g
Magnesium	14 g

Boswellic acids, curcumin, polyphenols
Indian frankincense extract (*Boswellia serrata*), tumeric extract (*Curcuma longa*), nettle extract (*Urtica dioica*), magnesium oxide, diatomaceous earth (diatomite)

Horsemix[®] ArthroFos

PROPER JOINT FUNCTIONING

Composition per 1 tablet

Glucosamine	450 mg
Chondroitin sulphate	325 mg
MSM (methylsulfonylmethane)	36 mg
Hyaluronic acid	18 mg
Vitamin D ₃	360 IU
Vitamin C	270 mg
Vitamin E	40 mg
Copper	4.5 mg
Manganese	27 mg
Zinc	27 mg
Calcium	17 mg
Phosphorus	15 mg
Magnesium	4.8 mg
Selenium	80 µg

Brewer's yeast, dicalcium phosphate, magnesium oxide

Formula in tablet form

- Glucosamine and chondroitin – proper nutrition for the joint
- Hyaluronic acid – the basic component of synovial fluid – increasing the penetration of nutrients into the tissues
- Hydroxychloride-derived micronutrients – support of cartilage regeneration
- Antioxidant complex – increasing the body's protection against free radicals
- Vitamin D₃ – stabilises the development of the skeletal system
- Vitamin C – collagen synthesis – the main component of joint cartilage
- MSM – joint reconstruction
- Boswellic acids, curcumin, nettle extract – proper joint mobility

When to apply

- Correct development of the musculoskeletal system in foals, weanlings, young horses
- Protection of joints in horses exposed to heavy loads (sport horses, working horses, pregnant mares)
- Support for degenerative changes in the locomotor system
- Support for osteoarthritis and joint inflammation
- Protection of stressed joints in overweight horses
- Recovery after injuries and orthopaedic surgery

How to apply

Foals – 3 tablets / day

Adult horses – 6-8 tablets / day

Packaging

150 tablets

Horsemix® Flex

JOINT CARTILAGE PROTECTION

- Collagen – an essential component of joint fluid, cartilage, ligaments and tendons – proper nutrition of the joint, elasticity, flexibility and regeneration of tendons, positive influence on bone density
- MSM – organic sulfur compound – joint, tendon and ligament regeneration
- Hyaluronic acid – basic joint fluid's component
- Increased penetration of nutrients into tissues
- Vitamin C – collagen synthesis, enhancing the effects of MSM
- Rosehip and echinacea extracts – support of the musculoskeletal system, increased joint mobility
- Improving hooves, skin and coat condition

When to apply

- Joint protection in foals, weanlings, sport horses, mares
- Protection of stressed joints in overweight, physical effort, racing etc.
- Support for degenerative changes in the musculoskeletal system
- Joint stiffness
- Recovery period

How to apply

1-2 measures (25-50 g) / horse / day

Packaging

1 500 g

600 g

Composition per 1 kg

Hydrolysed collagen type II	200 000 mg
MSM (methylsulfonylmethane)	160 000 mg
Hyaluronic acid	2 000 mg
Vitamin C	60 000 mg
Calcium	150 g
Phosphorus	60 g
Sulphur	57 g

Collagen peptides CHP, galactolipids, polyphenols, beta glucans, mannan-oligosaccharides (MOS)

Dicalcium phosphate, brewer's yeast, plant processing products: rosehip extract (*Rosa canina*), echinacea purpurea extract (*Echinacea purpurea*)

Composition per 1 kg

HMB (calcium salt β -Hydroxy β -methylbutyric)	250 g
Magnesium	27 g
Iron	1 200 mg
Gamma-linolenic acid (GLA)	1 300 mg
Vitamin A	8 200 IU
Vitamin E	27 000 mg
Vitamin C	20 000 mg
Biotin	81 000 μ g
Selenium	27 mg

L-Lysine 35g, Methionine+Cystine 5g, Threonine 10g, Tryptophan 3g, Valine 12g, Isoleucine 10g, Aspartic acid 18g, Serine 10g, Glutamic acid 20.3g, Proline 5.5g, Glycine 9.4g, Alanine 10.7g, Leucine 14.1g, Tyrosine 6.6g, Phenylalanine 8.6g, Histidine 4.4g, Arginine 10.3g

Beta glucans, mannan-oligosaccharides (MOS), omega -3 and -6 acids, flavonoids

Spirulina, brewer's yeast, linseed flour, seeds of fenugreek seed (Trigonella foenum-graecum), magnesium oxide

Horsemix[®] Muscle

SHAPE, REGENERATION, MUSCLE

- Supporting muscle development and functioning
- Increasing strength and performance
- Improved agility
- Accelerating muscle tissue regeneration after increased efforts (training, competitions)
- Protection against oxidative stress
- Reduction of free radicals formed after exercise
- Strengthening the organism
- Hooves protection

When to apply

- Enhanced physical activity – sport horses, working horses
- Post-exercise regeneration
- Recovery after surgery, diseases, etc.
- Support for a weakened organism (e.g. long-term stress)
- Support for musculoskeletal disorders

How to apply

3 measures (75 g) / horse / day

It is recommended to give the daily amount in 3 portions.

Packaging

1 500 g

500 g

Horsemix® Immuno-Garlic

IMMUNITY SUPPORT

- Prebiotic group – Beta-1,3/1,6-glucan highly purified, MOS – supporting the correct development of the bacterial flora by stimulating macrophages and lymphocytes to fight pathogenic microorganisms
- Garlic extract – antibacterial, antifungal, and anthelmintic, with a positive effect on respiratory, circulatory, and digestive systems
- Omega -3 and -6 acids – support the immune system, protect the nervous system and heart, prevent skin problems

When to apply

- Decreased immunity in autumn and winter season
- Heat stress
- Veterinary procedures
- Stay in the clinic
- Past illnesses, injuries
- Change of a stable, transport, competition
- Supportive in medical conditions
- Supportive in case of skin problems (e.g., ringworm)
- Contact with sick horses

How to apply

1 measure (25 g) / horse / day

Packaging

1 800 g

600 g

Composition per 1 kg

Beta-1,3/1,6-glucan	260 000 mg
Vitamin C	15 000 mg

Allicin, mannan-oligosaccharides (MOS), polyphenols, omega -3 and -6 acids

Garlic extract (*Allium sativum* L.), linseed flour, brewer's yeast

Composition per 1 kg

Vitamin C 980 g

Inulin, glucose

Horsemix[®] C-WIT

VITAMIN C WATER-SOLUBLE

- Increased immunity
- Strong antioxidant effect
- Participation in collagen synthesis and in other vital processes
- Supports the absorption of nutrients
- Natural prebiotic – correct development of bacterial flora

When to apply

- Intensive training, competitions
- Stressful situations
- Convalescence
- Advanced age
- Autumn – winter period
- Supportive during infections, allergies

How to apply

1-3 measures (5-15 g) / horse / day with feed or drinking water

Packaging

600 g

2 kg

Horsemix® Omega

LINSEED OIL
BORAGE OIL

- Rich source of essential fatty acids (EFA)
- Suitable ratio of omega -3 and omega -6 fatty acids for horses
- Excellent source of GLA – maintaining correct skin structure
- Proper skin nutrition, hydration and elasticity
- Improved coat condition
- Strengthening hooves
- Positive effect on the upper respiratory tract
- Antioxidant effect
- Improved joints functioning
- Liver protection
- Supporting regeneration of mucous membranes
- Strengthening of the immune, nervous, digestive, and circulatory systems
- Energy source for sport and working horses
- Improved condition, faster regeneration

How to apply

Foals and young horses – 25-50 ml / day

Adult horses – 50-100 ml / day

Horses with increased activity – 100-200 ml / day

Packaging

5 l

Composition per 1 l

Vitamin E (DL- α -Tocopherol)	4 500 mg
Tocopherol extracts of vegetable oils	1 800 mg

Gamma-linolenic acid (GLA), eicosapentaenoic acid (EPA), docosahexaenoic acid (DHA), linoleic acid (LA), alpha-linolenic acid (ALA), alpha-hydroxy acids (AHA), flavonoids

Linseed oil, borage oil

Composition per 1 kg

L-Tryptophan	200 000 mg
Vitamin B ₆	600 mg
Vitamin B ₁₂	100 000 µg
Vitamin C	10 000 mg
Magnesium	82 g

Green tea extract (*Camellia sinensis*), chamomile flower extract (*Matricaria Chamomilla*), melissa extract (*Melissa officinalis*), ginseng root extract (*Panax ginseng*), brewer's yeast, magnesium lactate, magnesium oxide

Horsemix[®] Calm

STRESS REDUCTION, CALMING DOWN

- Stress reduction in nervous, hyperactive horses
- Stress relief in sport horses
- Reduction of anxiety
- Calming and balancing
- Increase concentration

How to apply

- Stressful situations, i.e. competition, transport, exhibition, stable change, etc.
- Organism under strain from long-term treatment
- Excessive agitation, tendency to aggression, nervousness

How to apply

1 measure (25 g) / horse / day

If necessary, the quantity can be increased two or three times.

Packaging

1 600 g

400 g

Horsemix[®] Respiro Herbs

RESPIRATORY SYSTEM SUPPORT
IMMUNITY SUPPORT

- Preventing respiratory problems
- Strengthening immunity
- Detoxifying properties
- Support for expectoration of residual secretions
- Supporting respiration
- Soothing irritation

How to apply

- Supportive in disorders of the respiratory tract
- Support in inhalation allergies
- Supportive in respiratory tract inflammation and coughing
- Excessive mucus production
- Recurring respiratory tract problems
- Recovery after respiratory system diseases
- Period of decreased immunity

How to apply

1 measure (25 g) / horse / day

The amount can be increased if necessary.

Packaging

1 500 g

500 g

Composition per 1 kg

Beta-1,3/1,6-glucan	240 000 mg
Vitamin C	15 000 mg
Selenium	45 mg

Mannan-oligosaccharides (MOS), flavonoids, polyphenols, phytosterols, resins, tannins

Brewer's yeast, dandelion extract (*Taraxacum officinale*), nigella sativa extract (*Nigella sativa*), rosehip extract (*Rosa canina*), thistle extract (*Silybum marianum* L. Gaertner), thyme extract (*Thymus vulgaris*), marshmallow extract (*Althaea officinalis*), pine needle bud extract (*Pini gemmae*), anise seed (*Pimpinella anisum*), eucalyptus oil

Composition per 1 kg

Vitamin C (encapsulated)	3 530 mg
Selenium	45 mg

Flavonoids, polyphenols, phytosterols, resins, tannins

Dandelion extract (*Taraxacum officinale*), nigella sativa extract (*Nigella sativa*), rosehip extract (*Rosa canina*), milk thistle extract (*Silybum marianum* L. Gaertner), thyme extract (*Thymus vulgaris*), valerian extract (*Althaea officinalis*), pine needle bud extract (*Pini gemmae*), anise seed (*Pimpinella anisum*), seed flour, calcium carbonate, glycerol

DOLLYCK Horsemix[®] Respiro Herbs

RESPIRATORY SYSTEM SUPPORT
IMMUNITY SUPPORT

- Horsemix[®] Respiro Herbs in the form of a mineral lick – comfortable use both in the stable and on the pasture
- Guaranteed optimal intake according to individual needs
- Stimulation of saliva production – proper digestion
- Licking as an activity for the horse – mood enhancement, stress reduction

Packaging

4 kg

Horsemix® Universal

VITAMINS, MINERALS AND AMINO ACIDS
FOR HORSES OF ALL AGES

- Optimally selected vitamins in terms of quantity and proportion
- Minerals, e.g. in the form of hydroxychlorides
- Proper development and functioning of the organism
- Strengthening of overall condition
- Improved coat and hooves quality
- Strengthening of the skeletal system
- Optimal feed intake for each horse

When to apply

- Complementation of mineral and vitamin deficiencies in basic feeds
- Periods of increased demand – pregnancy, lactation, stressful situations
- Improved shape
- Immunity support

How to apply

Foals – 25 g / day

Weanlings, young horses – 50 g / day

Nonworking horses – 80 g / day

Recreational, sport horses in light training – 80-100 g / day

Horses in intensive training, pregnant and nursing – 100-200 g / day
