

DOLFOS[®]
PETS

**supplements
for exotic birds**

DOLFOS PETS is a Polish company, founded by veterinarians, developing a comprehensive range of formulas for companion animals. We have been present on the market for many years, offering top quality products, elaborated in cooperation with specialists in animal nutrition, veterinarians and technologists.

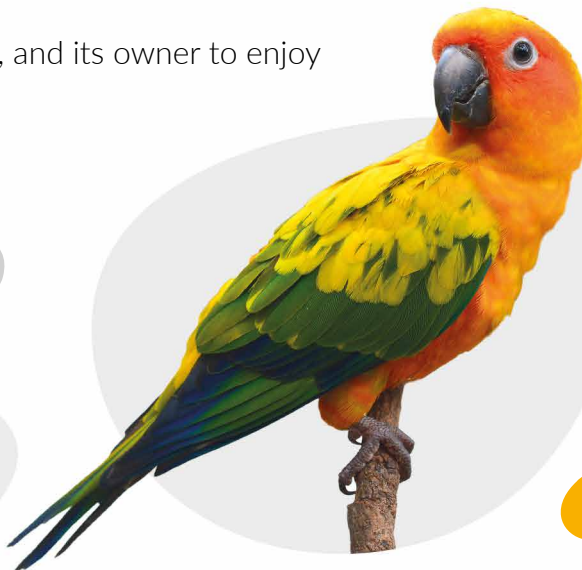

The health and wellbeing of animals is our priority.

The products we offer are manufactured from scratch in our company located in the centre of Poland. Raw materials, which undergo detailed verification in our laboratory, are obtained from renowned suppliers. For the production of our formulas we use safe ingredients with effectiveness confirmed by scientific research, which guarantees their maximum absorption.

Our production and distribution processes are improving systematically. We pay particular attention to the needs and signals from our customers, treating them as one of the policy elements that help us to develop, improve and modernise the company and its products.

In this catalogue, you will find an overview of the range of formulas that provide the answer to nutritional and health problems encountered by breeders and keepers of exotic birds.

We want every pet to be healthy and happy, and its owner to enjoy its company for as long as possible.

OrnitoVit® PARAKEETS

VITAMINS, MINERALS, AMINO ACIDS

for parakeets, small and medium-sized parakeets (budgerigar, cockatiel, lovebird, mulga parrot, scarlet-chested parrot)

- Carefully selected composition of vitamins, minerals and essential amino acids with high bioavailability
- Balanced development and proper functioning of the body
- Strengthening the overall shape
- Enhanced immunity
- Beautiful, healthy appearance
- Healthy, strong feathers
- Shortening and supporting the moulting period
- Correct bone mineralisation
- Liver support
- Optimised reproduction – high fertility, proper formation of egg shells, correct development of embryos
- Support in proper functioning of the digestive tract
- Reduction in the growth of harmful bacteria in the digestive tract
- Stress relief
- Water-soluble

Indications

- Supplementation of mineral and vitamin deficiencies
- Condition enhancement
- Strengthening immunity
- Periods of increased demand – moulting, breeding, nursing youngsters, exhibitions
- Stressful situations
- Support during infections
- Recovery
- Young growing birds

How to apply

1 measure (0.7g) per 50 ml of water. It is applied dissolved in water and birds take it according to their needs.

If applied with feed – 1 measure per one spoon of egg mix (amount for 10 adults Budgerigars). You can also give the measured amount mixed with soft food.

Packaging

60 g

Composition per 1 kg

Vitamin A	1 071 000 IU
Vitamin D ₃	121 500 IU
Vitamin E	3 785 mg
Vitamin C	10 720 mg
Vitamin B ₁	784 mg
Vitamin B ₂	858 mg
Vitamin B ₆	784 mg
Vitamin B ₁₂	3 720 µg
Biotin	27 200 µg
Niacin	5 000 mg
Pantothenic acid	1 284 mg
Folic acid	250 mg
Zinc	1 050 mg
Copper	193 mg
Iodine	70 mg
Selenium	10 mg
L-Methionine	5.3 g
L-Lysine	4.2 g
Calcium	15 g
Magnesium	6 g
Sulphur	2 g

Lactose, magnesium lactate, inulin, fructooligosaccharides (FOS), calcium lactate
