

DOLFOS[®]
PETS

**supplements
for rodents, rabbits
reptiles and amphibians**

DOLFOS PETS is a Polish company, founded by veterinarians, developing a comprehensive range of formulas for companion animals. We have been present on the market for many years, offering top quality products, elaborated in cooperation with specialists in animal nutrition, veterinarians and technologists.

The health and wellbeing of animals is our priority.

The products we offer are manufactured from scratch in our company located in the centre of Poland. Raw materials, which undergo detailed verification in our laboratory, are obtained from renowned suppliers. For the production of our formulas we use safe ingredients with effectiveness confirmed by scientific research, which guarantees their maximum absorption.

Our production and distribution processes are improving systematically. We pay particular attention to the needs and signals from our customers, treating them as one of the policy elements that help us to develop, improve and modernise the company and its products.

In this catalogue, you will find an overview of the range of formulas that provide the answer to nutritional and health problems encountered by breeders and caretakers of rodents, rabbits, reptiles and amphibians.

We want every pet to be healthy and happy, and its owner to enjoy its company for as long as possible.

RodeVit[®] Multi

VITAMINS, MINERALS, AMINO ACIDS for rodents and rabbits

- Carefully selected composition of vitamins, minerals and essential amino acids with high bioavailability
- Balanced development and proper functioning of the body
- Strengthening the overall shape
- Increased immunity
- Beautiful, healthy appearance
- Strong, dense and shiny coat
- Shortening and supporting the moulting period
- Correct bone mineralisation
- Optimised reproduction – high fertility, proper development of embryos
- Stress relief

Indications

- Supplementation of mineral and vitamin deficiencies
- Enhancing physical fitness
- Strengthening immunity
- Periods of increased demand – shedding, rearing, exhibitions
- Stressful situations
- Recovery
- Young, growing animals

How to apply

Rabbits, pet cavies – 2-3 measures (8-12 g) / day with food

Hamsters and other small rodents – 0.5-1 measure (2-4 g) / day with food

If necessary, the formula should be administered in pulp form with a syringe or spoon. For this purpose, the powder should be mixed with water in a ratio 1:2 (1 measure of powder per 2 measures of water) or in a larger amount of water.

Packaging

150 g

Composition per 1 kg

Vitamin A	240 000 IU
Vitamin D ₃	180 000 IU
Vitamin E	1 104 mg
Vitamin K	30 mg
Vitamin C	1 000 mg
Vitamin B ₁	39.6 mg
Vitamin B ₂	120 mg
Vitamin B ₆	47 mg
Vitamin B ₁₂	300 µg
Niacin	625 mg
Pantothenic acid	31.1 mg
Folic acid	15.5 mg
Biotin	1 500 µg
Choline chloride	3.53 g
Iron	1 180 mg
Manganese	570 mg
Copper	162 mg
Zinc	1 385 mg
Iodine	1.2 mg
Selenium	1.2 mg
Lysine	20 g
Methionine	4 g
Threonine	10 g
Cystine	1 g
Tryptophan	3 g
Valine	5 g
Calcium	33 g
Magnesium	11 g
Phosphorus	11 g
Sodium	1.5 g

Brewer's yeast, linseed flour, calcium carbonate from oyster shell, calcium and magnesium carbonate, dicalcium phosphate, omega-3 and -6 acid

RodeVit® Multi drink

VITAMINS AND MINERALS water-soluble for rodents and rabbits

- Carefully selected composition of vitamins, minerals and essential amino acids with high bioavailability
- Balanced development and proper functioning of the body
- Strengthening the overall shape
- Increased immunity
- Beautiful, healthy appearance
- Strong, dense and shiny coat
- Shortening and supporting the moulting period
- Correct bone mineralisation
- Optimised reproduction – high fertility, proper development of embryos
- Support the proper functioning of the digestive tract
- Reduced growth of unfavourable bacteria in the digestive tract
- Stress relief
- Water soluble – liquid form – fast absorption

Indications

- Supplementation of mineral and vitamin deficiencies
- Enhancing physical fitness
- Strengthening immunity
- Periods of increased demand – shedding, rearing, exhibitions
- Stressful situations
- Recovery
- Young, growing animals

How to apply

1 measure (0.7 g) per 25 ml of water

The preparation should be dissolved in the drinking water and poured into a drinker or bowl.

The animal will take in the necessary amount of vitamins and minerals along with the water.

Packaging

60 g

Composition per 1 kg

Vitamin A	2 750 IU
Vitamin D ₃	22 500 IU
Vitamin E	800 mg
Vitamin K	25 mg
Vitamin B ₁	98 mg
Vitamin B ₂	120 mg
Vitamin B ₆	156 mg
Vitamin B ₁₂	1 440 µg
Niacin	458 mg
Pantothenic acid	280 mg
Folic acid	28.5 mg
Biotin	6 000 µg
Zinc	1 925 mg
Copper	726 mg
Iodine	4.2 mg
Selenium	2.3 mg
Calcium	7.5 g
Magnesium	240 mg
Potassium	95 mg

Lactose, magnesium lactate, inulin, potassium carbonate, fructooligosaccharides (FOS), calcium lactate

RodeVit[®] C drink

Composition per 1 kg

Vitamin C

7 150 mg

VITAMIN C water-soluble for domestic cavies

- Covering the daily requirement for vitamin C, which is not synthesised in the bodies of domestic cavies
- Increased immunity
- Supporting the absorption of nutrients in the body
- Strong antioxidant effect

Indications

- Supplementation of vitamin C deficiency
- Stressful situations
- Old age
- Recovery after illnesses, operations
- Support during infections, allergies

How to apply

1 measure (0.7 g) per 50 ml of water

The preparation should be dissolved in drinking water and poured into a water bottle or bowl.
Due to rapid oxidation of vitamin C, the water should be changed daily.

Packaging

60 g

RodeVit® Gastro

PROTECTION AND REGENERATION OF THE DIGESTIVE TRACT INCREASED IMMUNITY

- Probiotic, prebiotics, beta glucans, composition of herbal extracts
- Proper functioning of the digestive tract
- Protection and regeneration of the digestive tract mucosa
- Regulation of digestive processes
- Alleviating irritation of the digestive tract
- Support proliferation of beneficial intestinal microflora
- Reduction in the growth of unfavourable bacteria in the digestive tract
- Reduced risk of intestinal disorders
- Boosting the immune system

Indications

- Support in digestive disorders (diarrhoea, flatulence, obstruction)
- Recovery after gastric diseases
- Antibiotic therapy
- Stressful situations
- Reduced immunity

How to apply

Rabbits, pet cavies – 2-3 measures (4-6 g) / day with food

Hamsters, rats and other small rodents – 0.5-1 measure (1-2 g) / day with food

The formula can be administered by coating a moist fruit or vegetable. If necessary, the formula should be administered in pulp form with a syringe or spoon. For this purpose, the powder should be mixed with water in a ratio 1:2 (1 measure of powder per 2 measures of water) or in a larger amount of water.

Packaging

60 g

Composition per 1 kg

Probiotic *Saccharomyces cerevisiae*
(CNCM I-4407) 10×10^{11} CFU

Beta-1,3/1,6-glucan 53 360 mg

Mannan-oligosaccharides (MOS), fructooligosaccharides (FOS), omega-3 and -6 acids, flavonoids, polyphenols, carvacrol, thymol

Linseed flour, brewer's yeast, pectins, inulin, anise seeds (*Pimpinella anisum*), Melissa extract (*Melissa officinalis*), thyme extract (*Thymus vulgaris*), rosemary extract (*Salvia rosmarinus*), sage (*Salvia officinalis*), liquorice root extract (*Glycyrrhiza glabra* L.), chamomile flower extract (*Matricaria Chamomilla*), diatomaceous earth (diatomite)

RodeVit[®] Carcifin

SUPPORT IN ANTI-CANCER THERAPY SENIOR SUPPORT

- Composition of vitamins and natural plant extracts
 - enhancement of psychomotor condition
- Rich source of natural polyphenolic compounds, including: curcumin, capsaicin – reducing the proliferation rate of cancer cells
- Natural immune factors – beta-1,3/1,6-glucans, MOS
 - stimulation of the immune system
- CLA, HMB – strength and vitality, inhibition of protein breakdown
- Omega-3 and -6 acids – support of the nervous system
- Strong antioxidant effect – neutralisation of free radicals
- Reducing distressing symptoms associated with advanced age
- Improved quality of life

Indications

- Support in cancer therapy
- Weakened organism, apathy
- Illness-related stress
- Reduced immunity
- Elderly animals

How to apply

Rabbits, pet cavies – 2-4 measures (1-2 g) / day with food

Rats, hamsters and other small rodents – 1-2 measures (0.5-1 g) / day with food

The formula can be administered by coating a moist fruit or vegetable. If necessary, the formula should be administered in pulp form with a syringe or spoon. For this purpose, the powder should be mixed with water in a ratio 1:2 (1 measure of powder per 2 measures of water) or in a larger amount of water.

Packaging

60 g

Composition per 1 kg

Beta-1,3/1,6-glucan	72 500 mg
Vitamin A	1 330 000 IU
Vitamin D ₃	132 000 IU
Vitamin E	12 000 mg
Vitamin K	260 mg
Vitamin C	40 000 mg
Zinc	2 000 mg
Selenium	40 mg

Mannan-oligosaccharides (MOS), CLA (conjugated linoleic acid), curcumin, capsaicin, quercetin, carvacrol, thymol, omega acids-3 and -6, flavonoids, polyphenols

Linseed flour, brewer's yeast, calcium salt of 3-hydroxy-3 methylbutyrate (HMB), safflower oil, tumeric extract (Curcuma longa), nettle extract (Urtica dioica), dandelion extract (Taraxacum officinale), nigella (Nigella sativa), rosehip (Rosa canina), green tea extract (Camellia sinensis), thyme extract (Thymus vulgaris), paprika extract (Capsicum annuum)

RodeVit[®] HepaUro

SUPPORT OF THE URINARY TRACT PROTECTION AND REGENERATION OF THE LIVER

- Urinary tract support
- Diuretic effect
- Liver function support
- Hepatic cells regeneration
- Removal of toxins and microorganisms from the body
- Liver processes support

Indications

- As an aid in kidney and lower urinary tract disorders.
- Support in liver failure

How to apply

Rabbits, pet cavies – 2-4 measures (1-2 g) / day with food

Hamsters, rats and other small rodents – 1-2 measures (0.5-1 g) / day with food

The formula can be administered by coating a moist fruit or vegetable. If necessary, the formula should be administered in pulp form with a syringe or spoon. For this purpose, the powder should be mixed with water in a ratio 1:2 (1 measure of powder to 2 measures of water) or in a larger amount of water.

Packaging

60 g

Composition per 1 kg

L-Methionine	40 000 mg
Vitamin C	10 000 mg
Choline chloride	4 000 µg

Silymarin, silybin, cynarin, galactolipids, phospholipids, polyphenols, flavonoids, beta glucans, mannan-oligosaccharides (MOS), omega -3 and -6 acids

Linseed flour, chitosan, cranberry (*Vaccinum macrocarpo*), parsley (*Petroselinum crispum*), nettle extract (*Urtica dioica*), dandelion extract (*Taraxacum officinale*), rosehip extract (*Rosa canina*), green tea extract (*Camellia sinensis*), thistle extract (*Silybum marianum* L. Gaertner), artichoke extract (*Cynara scolymus*), anise seeds (*Pimpinella anisum*), brewer's yeast, lecithin, inulin, diatomaceous earth (diatomite)

RodeVit[®] Respiro

SUPPORT OF THE RESPIRATORY SYSTEM

- Supporting the respiratory system
- Prevention of respiratory problems
- Support in dilution and expulsion of retained secretions
- Boosting immunity
- Supporting respiration
- Detoxifying properties
- Soothing respiratory tract irritation

Indications

- Support in respiratory disorders
- Support in inhalant allergy
- Support in respiratory tract inflammation, cough, rhinitis
- Excessive secretion of mucus
- Recurring problems with the respiratory tract
- Recovery after respiratory tract disorders
- Period of reduced immunity

How to apply

Rabbits, pet cavies – 2-4 measures (1-2 g) / day with food

Rats, hamsters and other small rodents – 1-2 measures (0.5-1 g) / day with food

The preparation can be administered by coating a moist fruit or vegetable. If necessary, the formula should be administered in pulp form with a syringe or spoon. For this purpose, the powder should be mixed with water in a ratio 1:2 (1 measure of powder per 2 measures of water) or in a larger amount of water

Packaging

40 g

Composition per 1 kg

Vitamin C	15 000 mg
-----------	-----------

Beta glucans, mannan-oligosaccharides (MOS), thymoquinone, galactolipids thymol, carvacrol, flavonoids, polyphenols

Linseed flour, brewer's yeast, anise seeds (*Pimpinella anisum*), fenugreek seeds (*Trigonella foenum graecum*), thyme extract (*Thymus vulgaris*), dandelion extract (*Taraxacum officinale*), valerian (*Althaea officinalis*), rosehip (*Rosa canina*), nigella (*Nigella sativa*)

RodeVit[®] Help

RESCUE FEED for rabbits and herbivorous rodents

- Covering the nutritional needs of weakened animals, without appetite, after surgeries
- Strengthening the body
- Shape improvement
- Appetite stimulation
- Support digestive processes
- Soothing irritation of the digestive tract
- Boosting immunity system

Indications

- Lack of appetite
- Weakness
- Recovery after surgery
- Support during illness
- Difficulties with food intake
- Old age

How to apply

Minimum 3 measures of powder (10 g) per 1 kg body weight per day. The daily portion should be divided into approximately 3-5 feedings. If necessary, the formula should be administered in pulp form with a syringe or spoon. For this purpose, the powder should be mixed with water in a ratio (1 measure of powder per 2 measures of water) or in a larger amount of water (the consistency depends on the individual needs of the animal).

Packaging

100 g

Composition per 1 kg

Vitamin C	4 000 mg
Vitamin D ₃	2 000 IU

Beta glucans, Mannan-oligosaccharides (MOS), fructooligosaccharides (FOS), omega-3 and -6 acids, carvacrol, thymol

Dehydrated alfalfa, linseed flour, maize flour, spirulina, fenugreek seeds (Trigonella foenum-graecum), anise seeds (Pimpinella anisum), wheat flour, rosemary extract (Salvia rosmarinus), nettle extract (Urtica dioica), rosehip (Rosa canina), liquorice root extract (Glycyrrhiza glabra L.), inulin, brewer's yeast

Analytical constituents

Crude protein 19%, Crude fibre 21%, Crude fats 4%, Crude ash 6.4%

Dolvit[®] Power

RESCUE FEED

for rodents and omnivorous reptiles and hedgehogs

- Meeting the nutritional requirements of weakened animals, without appetite, after surgeries
- Strengthening the body
- Shape improvement
- Appetite stimulation
- Support digestion processes
- Soothing irritation of the digestive tract
- Boosting immunity system
- High protein and fat source
- Improves the palatability of food

Indications

- Lack of appetite
- Weakness
- Recuperation after surgery
- Support during illness
- Difficulty with food intake
- Reluctance to food intake
- Old age

How to apply

Minimum 1 measure of powder (2.5 g) per 150 g of body weight / day. The daily portion should be divided into approximately 3-5 feedings. If necessary, the formula should be administered in pulp form with a syringe or spoon. For this purpose, the powder should be mixed with water in a ratio 1:2 (1 measure of powder per 2 measures of water) or in a larger amount of water (the consistency depends on the individual needs of the animal).

Packaging

100 g

Composition per 1 kg

Vitamin C	4 000 mg
Vitamin D ₃	2 000 IU

Beta glucans, Mannan-oligosaccharides (MOS), fructooligosaccharides (FOS), omega-3 and -6 acids

Insect flour, linseed flour, spirulina, maize flour, fenugreek seeds (Trigonella foenum-graecum), anise seeds (Pimpinella anisum), calcium carbonate from oyster shell, rosemary extract (Salvia rosmarinus), nettle extract (Urtica dioica), rosehip (Rosa canina), brewer's yeast, inulin

Analytical constituents

Crude protein 38%, Crude fibre 16%, Crude fats 3.8%, Crude ash 7.2%

ReptilVit

VITAMINS, MINERALS, AMINO ACIDS for reptiles and amphibians

- Carefully selected composition of vitamins, minerals and amino acids with high bioavailability
- Harmonious development and proper functioning of the body
- Strengthening of the overall shape
- High immunity
- Beautiful, healthy appearance
- Shortening and supporting the moulting period
- Optimised reproduction
- Appetite stimulation
- Alleviating the unfavorable effects of nutrition and environmental factors

Indications

- Supplementation of mineral and vitamin deficiencies
- Strengthening condition
- Boosting immunity
- Periods of increased demand
- Stressful situations
- Support during infections
- Recovery
- Young growing animals

How to apply

2-3 measures per 100 g of food thoroughly mixed

Packaging

100 g

Composition per 1 kg

Vitamin A	8 000 000 IU

Calcium	42 g
Phosphorus	30 g
Magnesium	10 g
Lysine	22 g
Methionine	7.5 g

Brewer's yeast, dicalcium phosphate, sodium chloride, calcium carbonate, magnesium oxide, beta glucans, mannan-oligosaccharides (MOS)

ReptilCal

CALCIUM SOURCE in the form of powder for reptiles

- Natural, contamination-free, easily digestible calcium
- Proper functioning of the body
- Proper development of the skeleton
- Proper egg shell formation

How to apply

Place the insect in the box with ReptilCal, coat it in the powder and give it to the animal.

For herbivores, the powder should be added to the feed or sprinkle onto fruit and vegetable mix.

Packaging

100 g
